Seeking	Start	Duration	Location
Mandatory internship (Pflichtpraktikum)	**Available immediately** Full-time from 1 October 2026	**20–26 weeks in total** From 6 weeks per placement	**Berlin, hybrid or remote** German residence permit, no visa sponsorship required

Profile

Product design student with a five-year fine-arts foundation and a research-led approach to interface work. I've shipped a published Chrome extension, a client website and brand system, and a self-initiated case study showing where JetBrains' AI pricing page leads buyers to confident but incorrect decisions. Looking for an internship where design decisions are validated against users, not assumed.

Selected projects

JetBrains AI Pricing Page — Independent UX Case Study

Sep 2026

Self-initiated · research, competitive analysis, IA, interactive prototype

- Ran a comprehension test on the live pricing page: five questions drawn from real user complaints, answered under time pressure, scored for confidence, then checked against official sources.
- Found that the page produces **high-confidence wrong answers** — the costliest failure, since those buyers purchase incorrectly and churn without contacting support.
- Analysed several dozen r/JetBrains reports; built user types, a decision map of confusion and emotional state, and a competitive teardown of GitHub Copilot and Cursor.
- Rebuilt the information architecture as a working prototype: plain-language plan descriptions, linked footnotes with return navigation, expandable product lists and an on-page FAQ.

Bloom — Chrome Productivity Extension

Jun – Jul 2026

Designer & Developer · published to the Chrome Web Store

- Designed and built a focus-support extension end to end — interface, focus timer and motivational UI — and shipped it publicly.
- Ran 3 user interviews and turned the findings into concrete changes to the timer flow and feedback states.

Live on the Chrome Web Store: chromewebstore.google.com/detail/bloom ↗

HKW Museum Project — Haus der Kulturen der Welt

Jun – Jul 2026

Team contributor & task coordinator · 4-person cross-functional team, Berlin

- Shaped the core concept and design direction for a university–museum collaboration.
- Coordinated tasks across the team to deliver the project on schedule.

Collaborative Academic Research Tool

Mar 2026

Self-initiated · research & prototyping

- Designed and prototyped a web platform for real-time academic collaboration in Figma.
- Ran user research with 5 students to find friction in shared academic work, then iterated the prototype on their feedback.

Law Firm Website Redesign & Brand Identity

Jan – Feb 2025

Freelance UX/UI Designer · client project

- Redesigned a 4-page website in Figma, restructuring navigation around what visitors came for: booking a consultation and understanding the firm's services.
- Created the full visual identity — logo, type and colour system — applied across every page.
- Work available on request (client site not publicly linked).

Education

B.A. Media and Communication Design
Macromedia University of Applied Sciences, Berlin
Expected Sep 2027

Diploma in Fine Arts (5 years)
Repin Art School, Moscow
2023

Classical training in drawing, composition and colour theory — the foundation of my visual and compositional judgement.

Fast-Track UX/UI Design Course
Yodiz School
2022

Languages

Russian	Native
Polish	C1
English	C1
German	A2, learning

Skills

Design
Figma, Framer, Adobe Creative Cloud

Research
User interviews, comprehension testing, competitive analysis, personas, journey & decision mapping, wireframing, interactive prototyping, iterative testing

Technical
HTML, CSS, responsive web design, motion graphics
